EMERGENCY RESPONSE WITHIN 48 HRS

New Vacuum Coating Equipment

YTI manufactures state-of-the-art PVD, CVD, and PECVD vacuum systems. More than thirty years of hands on experience and design capabilities in vacuum technology allows our engineers to analyze your process and offer sound, equitable solutions for your requirements. We work closely with our customers to ensure design integrity as the system is being constructed and integrate customer supplied equipment as requested.

Systems are available in bell jars, box coaters, load-lock, in-line, and batch. Likewise, a wide variety of sources can be installed, i.e., electron beam sources, thermal sources, ion sources, and magnetron or diode cathodes (RF or DC). YTI offers in–house automation technology to assure consistent performance. With lower start-up costs, and yielding a higher throughput and superior product, YTI offers the best price to performance ratio available.

Please call with your requirements and discover how YTI can make your company more competitive in today's high-tech environment.

Refurbished Vacuum Coating Equipment

YTI is the place to find the highest quality in refurbished vacuum coating equipment to meet your precision requirements. We sustain an extensive inventory of bell jars and box coaters equipped with electron beam sources and/or thermal deposition sources. We also maintain a variety of load-lock, in-line, and batch sputtering systems equipped with RF or DC supplies and utilizing magnetron or diode cathodes.

The equipment can be purchased in "as is" condition or, if you need to start production quickly, YTI can provide the service required to assure the system will be operational when

delivered. Any system can also be customized to meet your specific requirements.

Please call for pricing on currently available systems.

Services

- Highest Quality in Refurbished Vacuum Coating Equipment
- Extensive Inventory of Bell Jars and Box Coaters
- Electron Beam Sources and/or Thermal Deposition Sources
- LoadLock, InLine, and Batch Sputtering Systems
- RF or DC Supplies utilizing Magnetron or Diode Cathodes
- Operational Pricing or “As Is” Pricing
- Customized to meet your specific requirements

Vacuum Consulting

Vacuum equipment and process consulting is available from YTI. Our knowledge of state-of-the-art technology and more than thirty years of hands-on experience can solve your vacuum thin film problems. This knowledge and experience allows our engineers to recommend the appropriate equipment and process for your product or process problem.

Through systematic evaluation, YTI can analyze current process problems and offer sound, equitable solutions for such problems. Likewise, we can analyze your current processes and recommend a manageable transition into future technologies.

YTI offers on-site, teleconference, or telephone consulting. Contracts are available for both short and long-term projects.

Please call for a full description of our services and pricing.

Services

- More than Thirty Years of Hands-On Experience
- Extensive Knowledge of State-of-the-Art Technology
- Systematic Evaluation
- Sound, Equitable Solutions
- Manageable Transitions into Future Technologies
- On-Site, Teleconference or Telephone Consulting

- Short and Long-Term Projects
- Recommendations of the appropriate equipment
- Processes Tailored to your needs

Used Inventory

YTI stocks a large quantity of surplus systems and components. Please call us your requirements.
